

# A bassinet engineered for peace of mind.

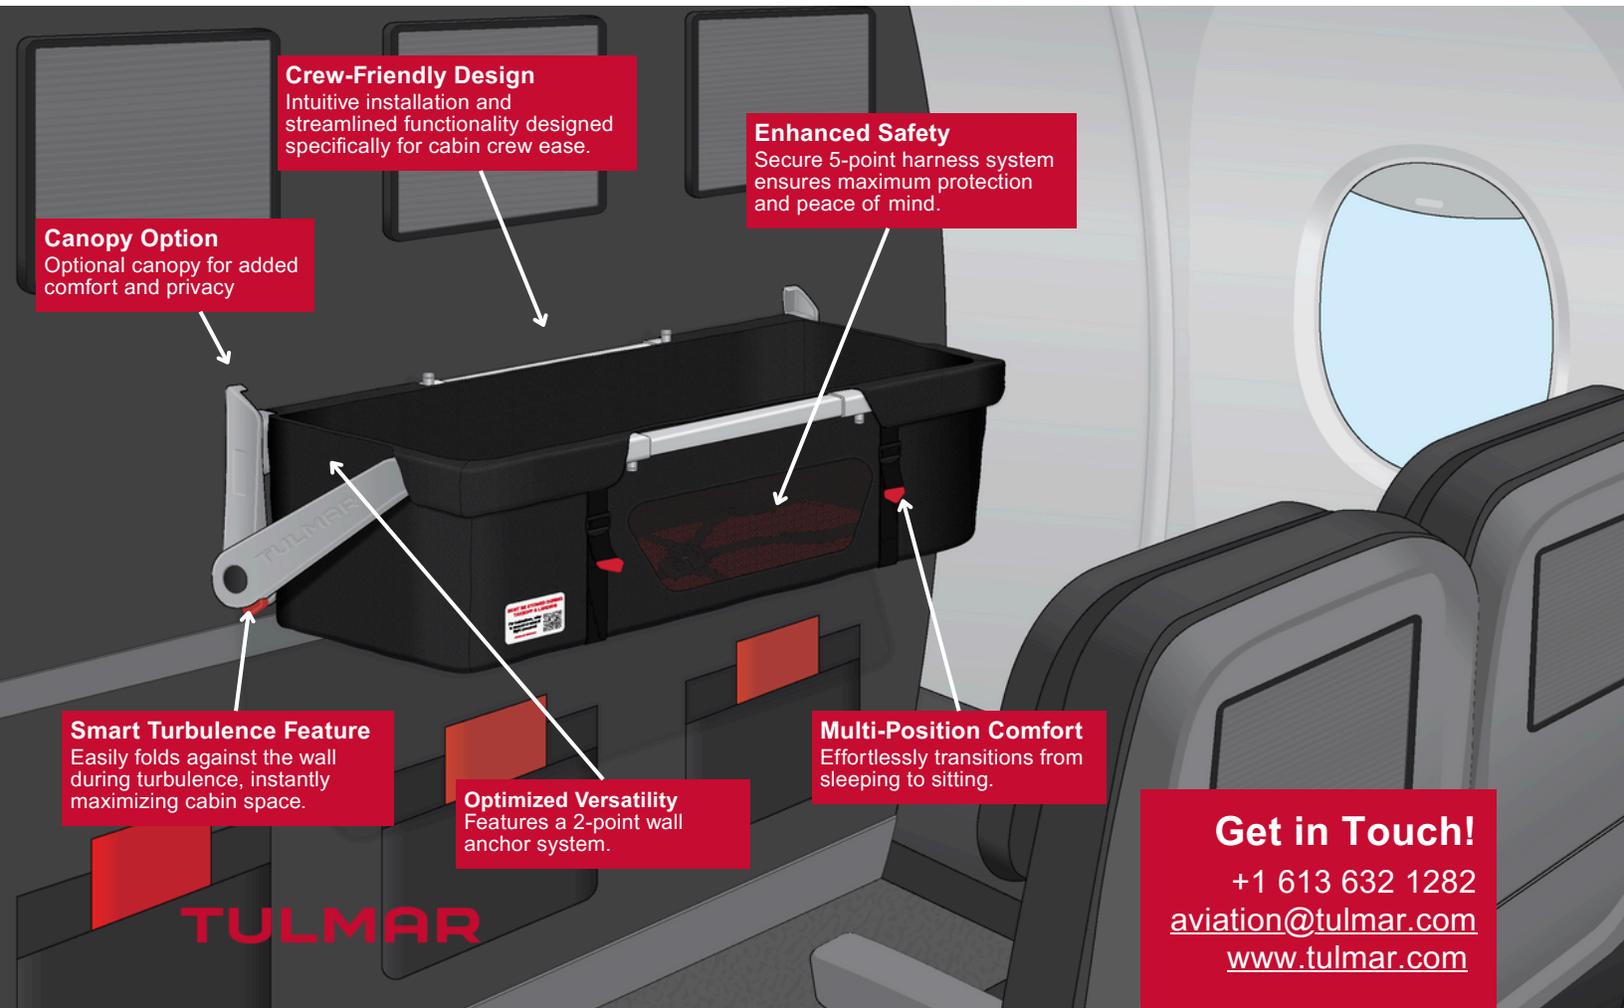

Hestia, Tulmar's **next-generation baby bassinet**, is engineered to deliver peace of mind for airlines, cabin crews, parents, and babies.

Developed through extensive market research and advanced engineering, Hestia prioritizes safety, comfort, and intuitive functionality. Designed for infants up to 18 kg (40 lbs), its space-saving structure helps reduce airline operational costs while enhancing passenger satisfaction. Easy to install, store, and maintain, Hestia's washable fabrics ensure hygiene and extended durability

Choose Hestia—transforming the in-flight experience with safety, efficiency, and comfort.

Wide range of colors available to suit your cabin interior.
