

INFLIGHT TRAINING PRODUCTS

Since 1992 Tulmar designs and builds a suite of Training Products that provides you with the same true and realistic emergency situation experienced in a Cabin or during an evacuation. Our line of training products will meet and exceed your expectations for durability, performance and low maintenance cost.

Slides

Designed for a wide range of door trainers. Detachable/replaceable floor, boarding ladder and girt available.

Girt Bar Trainers

Fully retractable platform to simulate wet training.

Mobile Training Carts

Innovative removable wall panels enable multiple training configurations such as fire extinguisher or other cabin safety training. Optional integrated power source and refillable oxygen bottle using shop air.

Protective Breathing Equipment

Several models available durable, washable and repairable. Removable/replaceable necks seal and nose piece.

Life Rafts

A robust new design to provide all the real-life situation training. Boarding ladder and canopy available for wet training.

Life Preservers

Single and dual chamber life preservers manufactured with standard TSO features.

TRAINING LIFE VESTS AVAILABLE FOR RENTAL
